

Name: _____

Use each situation to see how people and AI can work together.

AI can suggest ideas. People set the goal, test ideas, and decide what to use.

The Rainy-Day Recess Plan

Mina's class wanted a fun activity for indoor recess. The gym was being used, and the classroom had only paper, pencils and a small open space. Mina asked an AI helper for ideas.

The helper suggested a fast running game that needed a gym. Mina noticed that the idea did not fit the space. She asked for a quiet game using paper and pencils, with room for everyone to join. The helper suggested a picture-and-riddle challenge.

The class tried one short round. Some directions were confusing, so the students rewrote them and tested again. Their teacher checked that the activity was safe and included everyone. The AI gave a suggestion, but the class shaped and chose the final plan.

COMPREHENSION QUESTIONS

(1) What did Mina's class need an idea for?

(2) Why did the first suggestion not fit the class?

(3) What helpful details did Mina add to her request?

(4) How did the class improve the helper's suggestion?
