

## Complete 1000 with Hundreds

Grade 2

Name: \_\_\_\_\_

Find hundreds needed to reach 1,000.

Think: 10 hundreds total; subtract the hundreds you have.

**Example:**  $700 + \underline{\quad\quad\quad} = 1,000$ . Think: 7 hundreds + 3 hundreds = 10 hundreds = 1,000

(1)  $\underline{\quad\quad\quad} + 700 = 1,000$

(2)  $\underline{\quad\quad\quad} + 400 = 1,000$

(3)  $\underline{\quad\quad\quad} + 300 = 1,000$

(4)  $\underline{\quad\quad\quad} + 900 = 1,000$

(5)  $700 + \underline{\quad\quad\quad} = 1,000$

(6)  $400 + \underline{\quad\quad\quad} = 1,000$

(7)  $400 + \underline{\quad\quad\quad} = 1,000$

(8)  $200 + \underline{\quad\quad\quad} = 1,000$

(9)  $800 + \underline{\quad\quad\quad} = 1,000$

(10)  $200 + \underline{\quad\quad\quad} = 1,000$

(11)  $700 + \underline{\quad\quad\quad} = 1,000$

(12)  $800 + \underline{\quad\quad\quad} = 1,000$

(13)  $\underline{\quad\quad\quad} + 900 = 1,000$

(14)  $\underline{\quad\quad\quad} + 700 = 1,000$

(15)  $900 + \underline{\quad\quad\quad} = 1,000$

(16)  $\underline{\quad\quad\quad} + 200 = 1,000$

(17)  $100 + \underline{\quad\quad\quad} = 1,000$

(18)  $100 + \underline{\quad\quad\quad} = 1,000$
