

Drawing Quadrilaterals

Grade 2

Name: _____

Draw each shape clearly in the box.

Look at the name of each shape. Count the sides and check for parallel sides, right angles, or equal side lengths.

(1) Draw a **Rhombus**: All 4 sides are equal in length, opposite angles are equal.

(2) Draw a **Trapezoid**: It has exactly one pair of parallel sides.

(3) Draw a **Square**: All 4 sides are equal in length and all 4 angles are right angles.

(4) Draw a **Rectangle**: It has 4 right angles and opposite sides are equal in length.

- (5) Draw a **Parallelogram**:
Opposite sides are parallel
and equal in length.

- (6) Draw a **Quadrilateral with 4 unequal sides**: No sides are parallel and no angles are equal.
