

Drawing Quadrilaterals

Grade 3

Name: _____

Draw each shape clearly in the box.

Look at the name of each shape. Count the sides and check for parallel sides, right angles, or equal side lengths.

(1) Draw a **Rectangle** with two long sides and two short sides.

(2) Draw a **Square** with all sides equal in length.

(3) Draw a **Trapezoid** with exactly one pair of parallel sides.

(4) Draw a **Rhombus** with four equal sides and opposite angles equal.

(5) Draw a **Parallelogram** with opposite sides parallel and equal.

(6) Draw a **Quadrilateral** that has four sides and four angles.
