

Multi-Step Money Problems

Grade 3

Name: _____

Solve problems with two or more steps.

Example: Example: Tom buys a toy for \$3.00 and candy for \$1.50. He pays with \$5.00. How much change?

Step 1: $\$3.00 + \$1.50 = \$4.50$

Step 2: $\$5.00 - \$4.50 = \$1.50$

Answer: \$1.50

- (1) Lily buys a toy car for \$3.25 and a small book for \$4.50. She pays with a \$10 bill. How much change does she get back?
- _____
- (2) Tom wants to buy 3 stickers that cost \$0.75 each. He has a \$5 bill. How much change will Tom receive?
- _____
- (3) Maria has \$12.00. She spends \$5.50 on a new pen and \$3.00 on a notebook. How much money does Maria have left?
- _____
- (4) A small pizza costs \$7.00 and a large soda costs \$2.50. If David buys both, how much less does he spend than if he bought a \$12.00 video game?
- _____

(5) Emily saved \$8.75. She bought a comic book for \$3.50. Later, her grandma gave her \$2.00. How much money does Emily have now?

(6) Daniel buys a bouncy ball for \$1.50, a pencil for \$0.75, and an eraser for \$0.50. He pays with a \$5 bill. How much change does he get?

(7) A new art set costs \$9.50. Sarah has \$4.00 in her piggy bank and her mom gives her \$3.00. How much more money does Sarah need to buy the art set?

(8) John spends \$1.25 on a snack each day for 2 days. He started with \$10.00. How much money does he have left?

(9) A toy car costs \$4.75 and a small doll costs \$3.25. If Emma buys both items, how much money will she have left from a \$10 bill?
