

Multi-Step Money Problems

Grade 5

Name: _____

Solve problems with two or more steps.

Example: Example: Tom buys a toy for \$3.00 and candy for \$1.50. He pays with \$5.00. How much change?

Step 1: $\$3.00 + \$1.50 = \$4.50$

Step 2: $\$5.00 - \$4.50 = \$1.50$

Answer: \$1.50

- (1) Maria buys a comic book for \$3.75 and a sticker pack for \$1.50. She pays with a \$10.00 bill. How much change does she receive?

- (2) Tom buys a bag of chips for \$0.80, a soda for \$1.20, and a sandwich for \$2.50. He pays with a \$5.00 bill. How much change does he get?

- (3) Emily needs 2 notebooks for school. Each notebook costs \$2.25. If she pays with a \$5.00 bill, how much change will she receive?

- (4) David starts with \$15.00. He buys a new book for \$6.25 and a pen for \$3.50. How much money does David have left?

(5) A toy car costs \$7.00 and its batteries cost \$3.25. A video game costs \$9.50. How much more expensive is the toy car and batteries combined than the video game?

(6) Sarah saves \$3.00 each week for 3 weeks. After saving, she buys a movie ticket for \$7.50. How much money does she have left?

(7) John buys a magazine for \$4.75 and a drink for \$1.50. He pays with a \$20.00 bill. What is his change?

(8) Lisa has \$12.00. She buys 2 apples at \$0.75 each and 1 banana for \$0.50. How much money does Lisa have remaining?

(9) A shirt costs \$18.00 but has a discount of \$3.50. If you pay for the shirt with a \$20.00 bill, how much change will you get?

(10) Mark has \$25.00. He buys a video game for \$12.50 and a controller for \$8.00. With the money he has left, he buys a small toy for \$3.00. How much money does Mark have now?
