

## Long Division with Remainders: 2–3 Digit ÷ 1-Digit

Grade 6

Name: \_\_\_\_\_

Solve each division. Show work. Write quotient, remainder.

Example: 
$$\begin{array}{r} 37 \text{ R}1 \\ 3 \overline{) 112} \\ \underline{-9} \phantom{0} \\ 22 \\ \underline{-21} \\ 1 \end{array}$$

(1) 
$$6 \overline{) 590}$$

(2) 
$$6 \overline{) 670}$$

(3) 
$$6 \overline{) 958}$$

(4) 
$$8 \overline{) 500}$$

(5) 
$$6 \overline{) 686}$$

(6) 
$$6 \overline{) 986}$$

(7) 
$$6 \overline{) 506}$$

(8) 
$$6 \overline{) 670}$$
